Project Proposal

Project Name:

MLM - Multilevel Marketing System - ASP.NET + C# + SQL Server

Abstract:

As we come to know the importance of net & it is to be the most integral part of our lives today. In MLM – Multi Level Marketing or Network business client required always been updated regarding his on position in the MLM chain by keeping this point Web solution can keep updated member & same time for company it is very easy to manage the daily transactions. Multi-level marketing (MLM), also known as Network Marketing, is a business-distribution model that allows a parent company to market its products directly to consumers by means of relationship referrals and direct selling.

Proposed MLM system has all the options to manage member, manage member chain, and manage products. Multilevel Marketing System is a robust web-based software system with all the features necessary to run a successful MLM company

Project Scope:

From an end-user perspective, the Multi Level Marketing System Project consists of two functional elements: an enhanced searchable database for the search member, managing members, manages member chain, sale products, view transaction. And a system administration module.

- **Search and Manage Member, Managing Transaction:**
  An enhanced atomized online system is developed to maintain Members, Products, Member Chain, Transaction

- **System Administration:**
  A system administration module will be developed for the administrator of Multi Level Marketing System. This system will have the facilities like logical access management or LAM, included user administration and manage products

Modules:

Home, Contact, New Member, View Member, Login, Member Chain, Purchase, Purchase List, User, Product, Change Password, Etc.

To buy complete ready to submit synopsis, project report, source code, and data base script.

Software Requirements:

- ASP.Net, C#
- Visual Studio 2010 / 2012 / 2015 or Higher
- SQL Server 2008 / 2014 or Higher

Hardware Requirements:

Processor: Preferably 3.0 GHz or Greater.

RAM : 1 GB or Greater.

Limitations of the Software:

This project was developed to fulfill user requirement; however there are lots of scope to improve the performance of the Multi Level System in the area of user interface, database performance, and query processing time. Etc

Future Enhancements:

- Linking and integration of any legacy system for accounting.
- Integration with vendor database through Web Services.

Project Details:

- No of Form, Pages, Reports in project source : **19**
- No of database tables : **6**
- No of pages in project report : **90**
